

A643

40mm RECTIFIER DIODE

4400V / 1000A

The A643 rectifier diode features a nominal 40mm silicon junction diameter design, manufactured by the proven multi-diffusion process. High reverse voltage blocking capability is optimized with moderate recovery current and low forward voltage.

A643 is designed specifically for transportation, industrial and utility 50/60 Hz rectifiers having very high current surge and I^2t requirements.
