## SILICON POWER CORPORATION COMPLETES ACQUISITION OF FOUNDRY ASSETS OF FORMER MICROSEMI WAFER FAB

Malvern, PA - May 2, 2019 – [www.siliconpower.com](http://www.siliconpower.com) - Silicon Power Corporation on May 1, 2019 completed the acquisition of the foundry assets of the former Microsemi wafer fab located in Bend, Oregon. This site had been developing leading edge RF and Power devices in Silicon and Silicon Carbide for over 30 years.

Silicon Power is pleased to announce the formation of its new subsidiary company, SiCamore Semi, LLC, in Bend, Oregon ([www.sicamoresemi.com](http://www.sicamoresemi.com)) SiCamore Semi aims to enable the rapid development, prototyping and volume manufacturing of high-power devices in Silicon, Silicon Carbide and new materials, and enable our customers' competitive advantage through the expertise and flexibility we can offer.

Silicon Power's president Dr. Harshad Mehta said "In our quest to continue forging ahead in the high-power electronics frontier, we are proud and honored to announce a new venture! With SiCamore Semi, we hope to deliver highly reliable Manufacturable, Useable, Sellable, Technology (MUST)-driven solutions to our valued customers. We believe our years of unmatched core expertise in high-power device physics, processing packaging, and end use applications puts us at the forefront of the high-power electronics universe"

Silicon Power extends its appreciation to both Summit Bank and the Bend, Oregon community for their support assisting the company in its efforts to obtain the critical SBA financing for this acquisition.

Silicon Power Corporation is headquartered in Malvern, PA and has recently celebrated its 25 years in business as a leading developer and solutions provider dedicated to the design, development, test, and manufacture of high-voltage semiconductor switches, high-voltage pulsed-power switches, and high-power utility-applicable systems.
